President Fenves’ Priorities

• Hire & retain outstanding faculty
• Continue to transform undergraduate education
• Drive interdisciplinary collaborations
• Promote diversity & inclusiveness
Bridging Barriers is a faculty and researcher-driven process to identify the hard questions that will launch new research directions. These questions will produce the next generation of insights, breakthroughs and creations. These questions will:

- Engage significant societal problems for the coming decades;
- Address problems in basic research that can expand the human imagination and set the stage for the practical solutions to problems that don’t yet exist;
- Address problems in humanities and social sciences, where answers will enrich and deepen our experience of the world and society around us.
“UT’s scholars will develop areas of study through white papers, in-depth interviews and small group discussions to generate ideas. To support Bridging Barriers and advance our research mission, we will make substantial investments by adding 50 new faculty positions over the next several years.”
The UT Pop-Up Institutes are organized around interdisciplinary teams that work together for about one month toward a common research-related goal, in a common physical space, and they produce a research product based on in-depth preparation for a larger future initiative, collaborative work to carry out a defined investigation, or an effort to bring a single or group of partially completed projects to a successful conclusion.

- Seeing the Tree & the Forest: Understanding Individual & Population Variation in Biology, Medicine & Society
- Discrimination & Population Health Disparities
- DH@UT: Building a Digital Humanities Ecosystem for Innovative Research in the Liberal Arts
Diversity & Inclusion

- Provost McInnis has charged each dean with creating a Diversity & Inclusion Committee
- Must include the gender equity and the CREED representatives
- Report due to the Provost by April 14, 2017
UTCOP Transformative Goals

- Fundamentally transform Pharm.D. education in a manner that uniquely prepares our graduates to adapt, to excel, and to become leaders.
- Attract the best graduate and postdoctoral candidates, provide them with the highest possible quality of training and productivity, and mentor them to be competitive for the top jobs in their fields.
- Become a top five research program that fosters and rewards research excellence, including a culture of leadership, risk-taking, and collaboration for translating innovations to improve health.
- Recruit, develop, and mentor a diverse group of faculty and staff, and provide them the opportunity to reach their individual potential for career and professional development in education, research, and service.
Pharm.D. Program Outcomes

- **Essentials for Practice Centered Care**
  - Patient centered care, medication use system management, health & wellness, population based care

- **Essentials of care**
  - Problem solving, provide education, patient advocacy, interprofessional collaboration, cultural sensitivity, communication

- **Personal & professional development**
  - Self-awareness, leadership, entrepreneurism & innovation, & professionalism
Conservative Budget Planning

UTCOP ended FY 2015-16 in the black for recurring revenues and expenses

Current faculty recruitment
- Chemical Biology & Medicinal Chemistry is the only current active recruitment for this year.

Needs:
- Resources to capitalize on collaborative opportunities with Dell Medical School & other programs
- Staff support for experiential education, student affairs, & college support

Going forward: Projected balanced budget through 2021-22
- Carve out 2% per year for merit pools: 2016-17 thru 2021-22
- Decrease 1 TT faculty FTE by 2021-22
• Health rate per FTE student = 15.91
• Academic rate per FTE student = 4.32

• Health funding rate is 3.68 X higher than academic pharmacy rate

• Based on the base period used to fund the 2015-2017 biennium
